

SPECIAL HARDWARE COLLECTION SPRING SUMMER 2007

MORE THAN WOOD
UNDER YOUR FEET

HARDWARE SPECIAL COLLECTION SPRING SUMMER 2007

We manufacture all our boards out of maple wood, 100% genuine maple from the great American lake areas.

Each of our boards are created individually, each phase of the process is carried out in a particular and intimate way. We pamper the wood during each step of the process while creating the shape of what is to become a skateboard by Jart factory.

We pay special attention to every detail; quality, durability and design.

The quality of our products is our trademark. We dispose of the best quality wood, the finest professionals and all the latest technology to produce our quality products under the Jart trademark.

Durability is a must for Jart, and this conveys confidence. We feel the confidence that all our clients and friends have in us, and this is what makes our technical team and professional skaters test the products day after day, to make improvements and create the best and longest lasting products in order to be able to enjoy top level skating.

There are two different phases in designing, both equally important: the shape of the board and its graphics.

The different shapes of our boards are achieved after experimenting with three dimensional models, calculating their response in different surroundings, in parks, on the streets, etc. The outcome of these shapes and concaves represent one of the greatest success stories developed by the whole Jart family, gaining world-wide influence on the global market and becoming one of the most important brand names in Europe.

On the subject of graphics, it is clear to see the enormous interest we have in inviting the best artists and designers in the skateboarding world to join our team. This shows on our products, our graphic frameworks, canvases and walls converted into skateboards, wheels, bearings, T-shirts, sweat-shirts, accessories, etc.

The result of the process is something as simple as a skateboard, but not any skateboard. The result is a genuine Jart skateboard, made with a little piece of each of the components of the Jart family, or at least that is how we feel. We feel it is something really authentic, with its own personality. Now it's your turn to use it. Skate with passion. Enjoy it.
